

Buying a Used Car

Did you know...

- That you can shop around for money?
- That the monthly payment is the *LAST* thing you should consider when trying to find the best loan deal?
- That auto loans may include “hidden charges” such as special up-front finance fees and/or mandatory insurance coverage?
- That you will probably get more money for the car you are getting rid of by selling it yourself, rather than trading in to the auto dealer?
- That you can find out on the Internet estimates of what your old car is worth...and what the car you want to buy should probably cost?
- That the state *REQUIRES* you to purchase car insurance?
- That you may be able to lower your car insurance costs by getting good grades in school?
