“Consumption and Production Charades” Activity

Infusionomics Themes, Keystone Economic Principles, and Skills for the 21st Century Marketplace:

- **THEME: COSTS**
 - **Keystone Economic Principle™ #1:** We all make choices
- **THEME: RESOURCES**
 - **Keystone Economic Principle™ #4:** Economic systems influence choices
 - **Keystone Economic Principle™ #6:** Do what you do best, Trade for the rest
 - **Skills:** 16. Communication Skills; a. Oral, Written, Body Language (positive and normative economics)
- **THEME: INCENTIVES**
 - **Skills:** 23. Marketing; a. Product/Service Creation

** For additional standards and content references, please see the [end of document](#).

Overview:

In the Consumption and Production Charades activity, students play a game of charades, acting out the roles of producers and consumers.

Objectives:

In this activity, students learn how goods and services are produced and consumed.

Materials and Handouts:

Printed pictures of producers and consumers ([Supplement #1](#) – cut each page in half so that each slip of paper has only one picture on it)

Activity:

- Provide 10 students with a picture of a consumer or a producer (printed from [Supplement #1](#)). Tell the students not to show their picture to anyone else.
- Play a game of charades in which each student performs the action shown in his or her picture. As each person's action is guessed, list the actions on the chalkboard in two columns. Without putting headings above the columns, list producers in one column and in the other list consumers.

- If the students have trouble guessing the charade, give them hints.
- After all 10 pictures have been completed, ask students to decide what the actions in each column have in common. Brainstorm with students headings for the columns. *[The students may say, 'These people (the consumers) are using something, they're taking something. The other people (the producers) are creating or selling something.]*
- After the students brainstorm, write the words consumer and producer above the appropriate columns. Explain that in economics, a producer is a person or business that makes goods or provides a service for sale. A consumer is a person who buys or uses goods and services.
- Next, explain that we are all producers and consumers. We make goods and do services, and we use goods and services. Ask students to try to think of times when they have been a producer and times when they have been a consumer.

Additional Standards and Content References

Voluntary National Content Standards in Economics:

- Standard #1 : Scarcity; Consumers, Opportunity Cost, Producers, Wants, Entrepreneurship
- Standard #2 : Decision Making; Cost/Benefit Analysis
- Standard #6 : Specialization; Production, Specialization, Gains from Trade
- Standard #7 : Markets and Prices; Markets exist where buyers and sellers interact

Partnership for 21st Century Life Skills Concept:

- Communication and Collaboration > Communicate Clearly
- Critical Thinking and Problem Solving > Make Judgments and Decisions

National Content Standards for Entrepreneurship Education:

- Ready Skills, D. Communications and Interpersonal Skills; Fundamentals of Communication
- Business Functions; L. Marketing Management; Product/Service Creation

Economics Vocabulary:

- **Consumers** - People who use goods and services to satisfy their personal needs and not for resale or in the production of other goods and services.
- **Division of Labor** - An arrangement in which workers perform only one step or a few steps in a larger production process (as when working on an assembly line).
- **Gains from Trade** - The increased output resulting from trade; with trade, each individual, region or nation is able to concentrate on producing goods and services that it produces efficiently, while trading to obtain goods and services that it does not produce.
- **Opportunity Cost** - The second-best alternative (or the value of that alternative) that must be given up when scarce resources are used for one purpose instead of another.
- **Producers** - People and firms that use resources to make goods and services.
- **Specialization** - A situation in which people produce a narrower range of goods and services than they consume. Specialization increases productivity; it also requires trade and increases interdependence.
